

ONE STOP MODEL SOLUTION

For scan, design and manufacturing jobs — as a service.

A future-looking startup transforming complex engineering designs into flawless realities. ISO 9001:2015 Certified.

ABOUT US

We deliver uncompromising engineering excellence by integrating advanced production technologies.

We provide our clients with absolute precision, speed, and scalable quality in every custom part we produce.

[LEARN MORE →](#) STRATEGIC DIRECTIVE

OUR VISION

"To be the world's most trusted and agile manufacturing partner, transforming complex engineering designs into flawless realities without friction and delay."

COST EFFECTIVE

Integrated workflows and material science minimize baseline production costs.

UP TO -30% COST REDUCTION

SMART

Unified CNC, laser, and additive ecosystem for rapid turnaround from CAD to Part.

<24H CAD-TO-GCODE

HUB

✓

RELIABLE

Backed by strict ISO 9001 compliance and 50+ years of technical manufacturing depth.

100% CMM VALIDATED

AUTOMATED ECONOMIC OPTIMIZATION

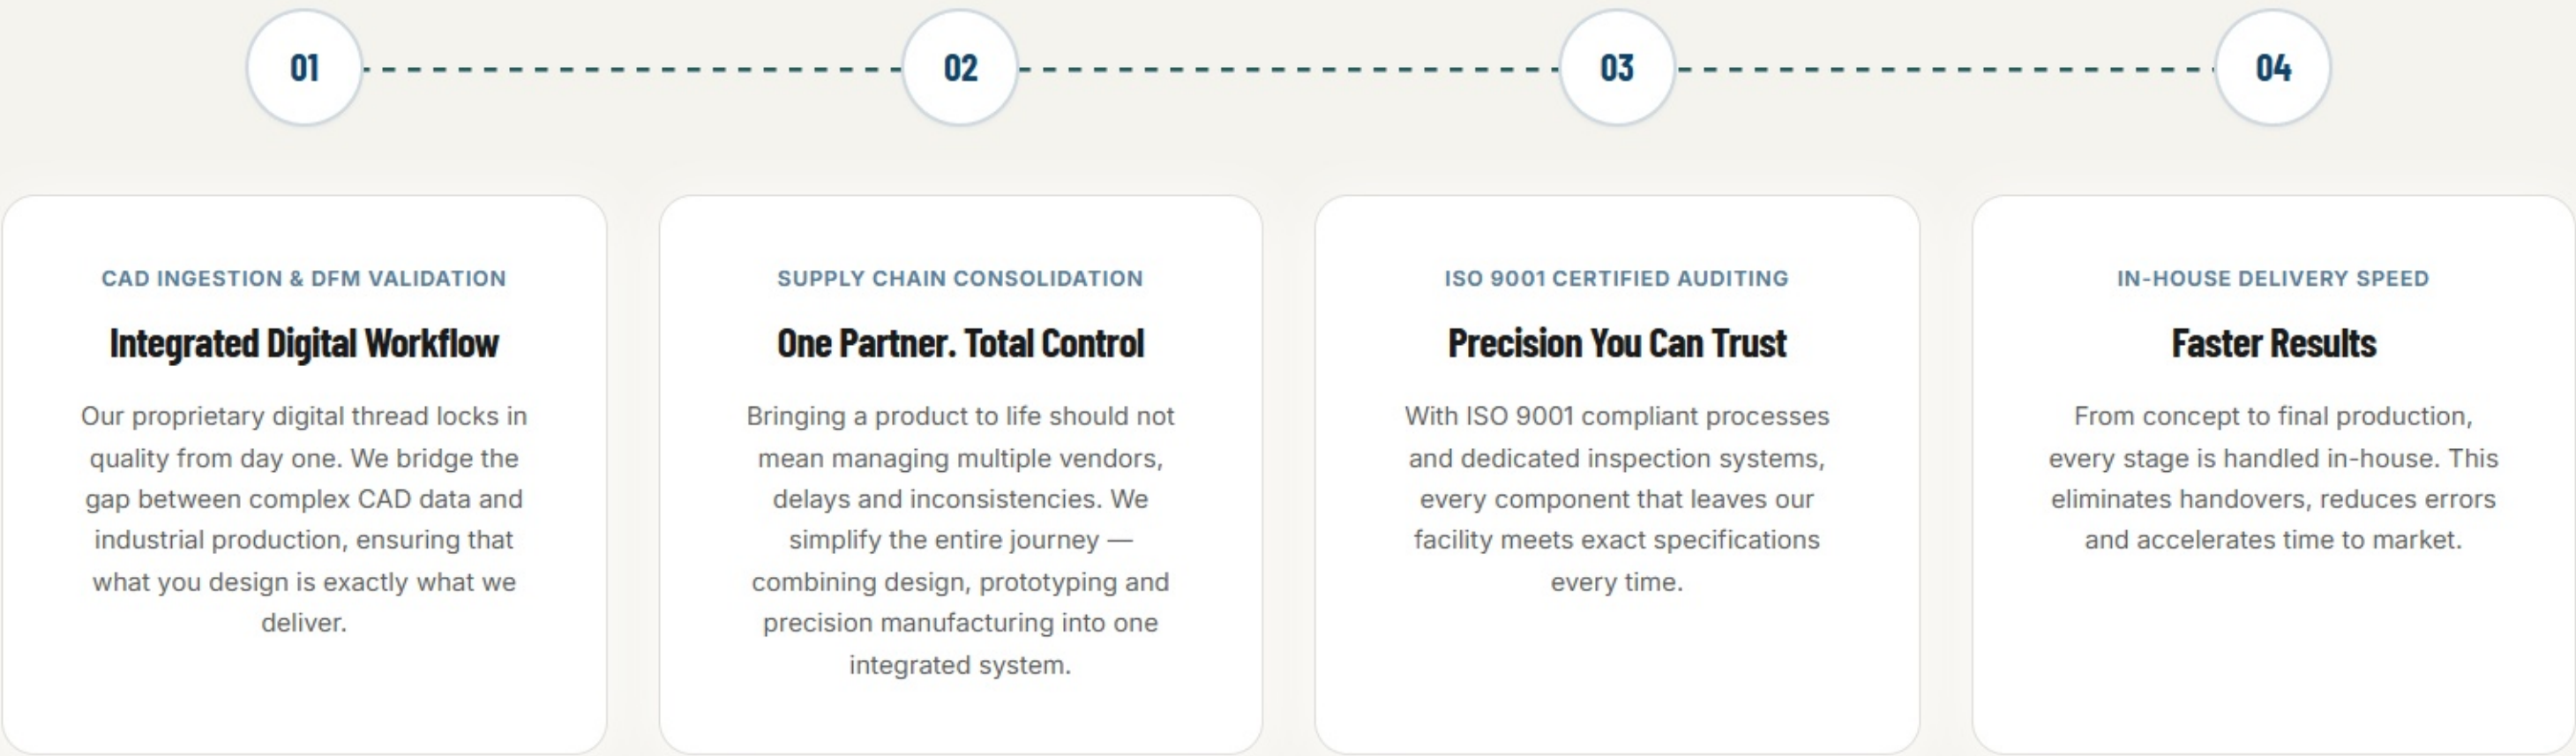

UP TO -30% COST REDUCTION

- ✓ Real-time Design for Manufacturability (DFM) assessment feedback.
- ✓ Smart nesting algorithms reduce raw material scrap rates by 22%.
- ✓ High-throughput digital batches bypass traditional hard-tooling costs.

WHY PARTNER WITH US

Get to production, faster.

We eliminate supply chain fragmentation by combining design, metrology, and high-performance manufacturing under a single roof. Our sequential process ensures absolute control from initial CAD import to final product shipment.

CAPABILITIES IN-HOUSE

Advanced Engineering Services

Industrial-grade B2B design, validation, and agile prototyping capabilities. Filter by industry below to pinpoint how our digital manufacturing ecosystem serves your sector.

- ALL
- AEROSPACE
- HEALTHCARE
- AUTOMOTIVE
- DEFENCE

01

ADVANCED SLS & MULTI-JET FUSION

Additive Manufacturing

Eliminate hard-tooling costs and bridge the gap from prototype to production with high-throughput industrial 3D arrays.

TECHNICAL SPECIFICATIONS

02

MULTI-AXIS CNC MACHINING

Precision Manufacturing

Achieve absolute structural integrity for mission-critical parts with our 5-axis vertical machining centers.

TECHNICAL SPECIFICATIONS	
MACHINING	TOLERANCES
5-Axis CNC and Vertical Mining	±0.005mm
APPLICATIONS	FINISHES
Aerospace Structural & Engine Parts	Anodizing, Bead Blasting, Passivation
AEROSPACEAUTOMOTIVEDEFENCE	

03

3D METROLOGY & CAD DIGITIZATION

Reverse Engineering

Bring legacy hardware into the digital age using portable non-contact laser metrology and point-cloud generation.

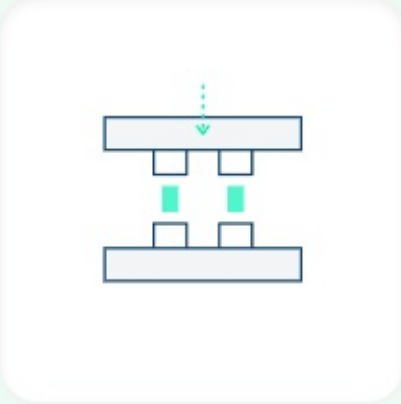

TECHNICAL SPECIFICATIONS	
INSPECTION	OUTPUT
Laser Scanning & CMM verification	Native CAD Parameters (IGES, STEP)
VALIDATION	ACCURACY
Deviation checks & DFM analysis	Up to ±25 microns
AEROSPACEHEALTHCAREAUTOMOTIVE	

04

VACCUUM CASTING AND SOFT MOLDING FRAMEWORKS

Tooling & Casting

Unlock functional alpha-testing without the expense of injection hard-tooling using silicone patterns and polyurethanes.

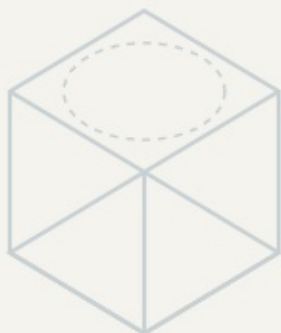

TECHNICAL SPECIFICATIONS	
PRODUCTION	PATTERNS
High-Fidelity Polyurethane Parts	Master Silicone Mold Engineering
TURNAROUND	VOLUME
Rapid Batch Verification (7-10 days)	10 to 100+ production-grade units
AUTOMOTIVEDEFENCEHEALTHCARE

Our Work

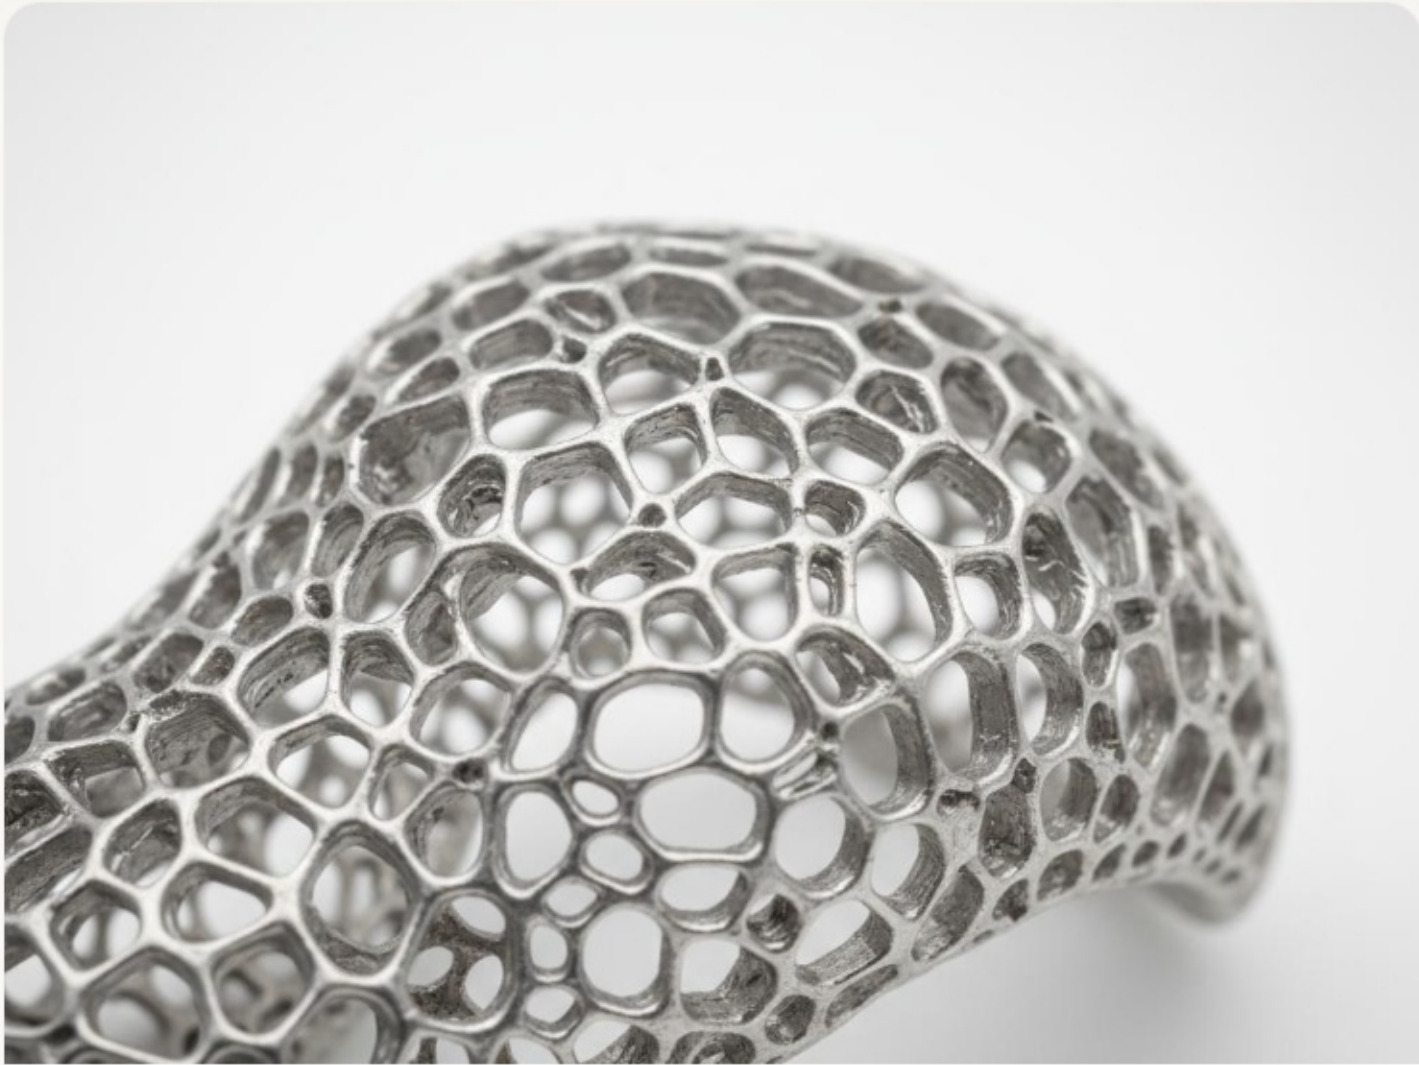

DEFENSE / UAV

Aerospace

Military-grade VTOL assembly engineered for high-precision mission reliability. We provided isotropic HP MJF PA12 structural airframes. Integrated in-house post-processing and tactical assembly.

PA12 PRINT ASSEMBLY

MEDICAL IMAGING

Precision Health

Handheld retinal imaging systems representing 5+ years of continuous production excellence. We provided clinical-grade Med-SLA and MJF components with full clinical assembly.

SLA MJF PAINT ASSEMBLY

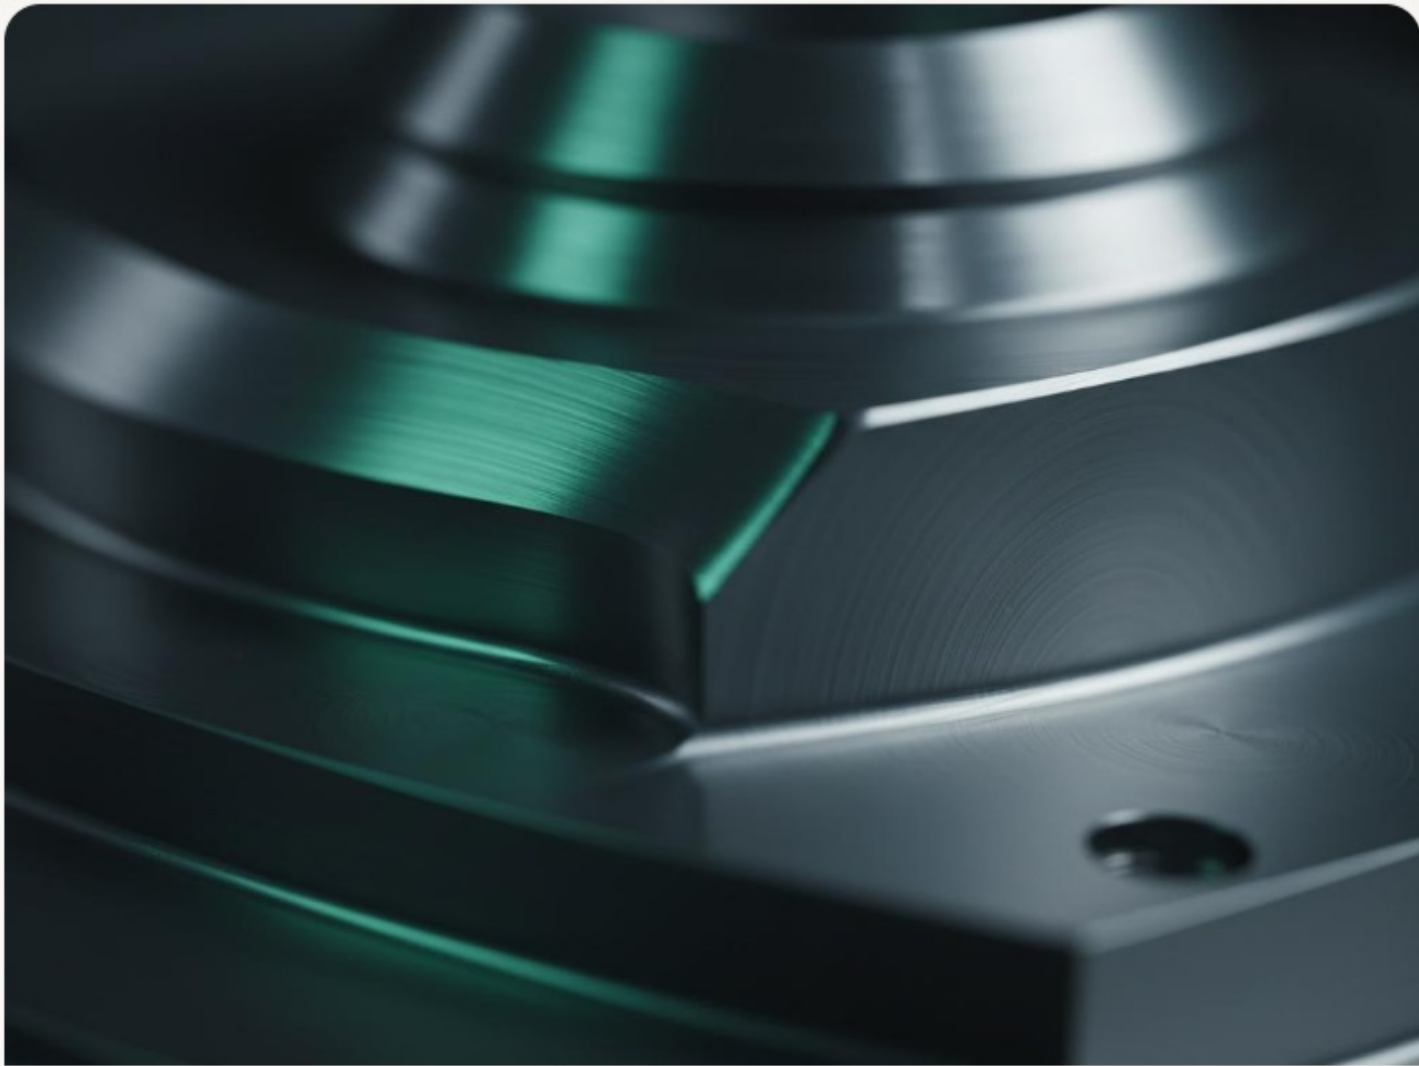

ROBOTICS / VTOL

Precision Robotics

Aircraft-grade machined components for long-endurance platforms. High-complexity 5-axis CNC rotor hubs with sub-10 micron tolerances for mission-critical reliability.

AL-7075 5-AXIS MICRON

ADVANCED DESIGN UNIT

Digital Twin

High-resolution 3D scanning and CAD replication for performance consumer appliances. We provided advanced teardowns and DFM optimization for our customer.

3DSCAN SOLIDWORKS DFM

OUR PROCESS

From Digital to Physical

Our streamlined process takes your concept from CAD file to finished part in as little as 48 hours.
